Goals

- In the Computer Lab this afternoon, you will
 - fork this repo to your own GitHub account
 - clone this forked repo to your laptop or desktop
 - document each of the following with an issue:
 - **run the existing tests**
 - **create a branch**
 - create a new example, based on one of the existing tests
 - merge the branch back into 'master'
 - decide what part of the code you would like to test
 - **create an 'issue' in the original repo regarding your plan to create a test**
